ROADWORKS LICENSING

**Title: Marking the Map on Works Segment**

**Reference:**

37

**Revision:**

1

**Date:**

27/03/17

# Zoom into map location to access marker buttons to mark the “Works Segment”.

The screenshot shows the MapRoad website interface. The browser address bar displays <https://uat.maproadworkslicensing.ie/MRL/ManageLicense-18198-1>. The page header includes the MapRoad logo and a Cookie Policy notice. The main navigation bar shows 'No Code T4' and 'Cork County Council'. The 'Licence Form' section is active, with tabs for 'History' and 'Fees'. The 'Works Segments' section is highlighted, and the 'Emergency Draft' toggle is set to 'Off'. The 'Works Segments' section contains a text box for 'Location Description' with the value 'sample, street, sample townland, sample town', a 'Road Segment Number' field with the value 'R----', and buttons for 'Remove' and 'Add Road'. Below the text boxes is a map showing a road network. A red arrow points to the map controls on the left side of the map. A red starburst callout box contains the following text:

Scroll over button to identify its function.  
“Draw a Polyline” marks trench.  
“Draw a Marker” shows the excavation location.

On scrolling over the button its function is identified.

The screenshot displays the MapRoad website interface for managing a license. The browser address bar shows the URL: <https://uat.maproadworkslicensing.ie/MRL/ManageLicense-18198-1>. The page header includes the MapRoad logo, a Cookie Policy notice, and navigation links for Help-FAQs and Admin-Logout. The main navigation bar shows 'No Code' for 'Cork County Council' and an 'Emergency Draft' toggle. The 'Licence Form' is active, with tabs for 'History' and 'Fees'. The 'Works Segments' tab is selected, showing a list of actions: Works Segments, Works Details, Traffic, Assets Affected, Attachments, and Standard Conditions. The 'Works Segments' section contains a text box for 'Location Description' (pre-filled with 'sample, street, sample townland, sample town'), a 'Road Segment Number' field (pre-filled with 'R----'), and 'Remove' and 'Add Road' buttons. Below the form is a map with a 'Draw a polyline' tooltip over a button. The right sidebar contains a 'Stage Description' section with detailed instructions and 'Licence Actions' including 'Submit' and 'Delete Draft'. The Windows taskbar at the bottom shows the date and time as 09:56 on 22/03/2017.

Select the required marker and locate accordingly.

### Works Segments

Please identify exactly where each excavation or trench will take place. To do so, click the - icon on the top left of the map until fully zoomed in on the location. Then click on the excavation marker or polyline tools. Move the Marker / Drawing Tool across the map and click on the map to pin point as accurately as possible the location of the excavation or trench. It is possible to edit the details of existing excavations and trenches by clicking on the excavation marker or trench line once it has been positioned.

2 m  
Click to continue drawing line.

Stage Description

Before you can proceed to carry out emergency works, you must submit a notification to the licensing authority. Please provide as much detail of the emergency works to be carried out. The minimum requirement before you can start works, is that you state the location description, the nature of emergency, a description of the works you intend to carry out and insurance policy details. Once submitted, you will be able to download your licence certificate from the documents folder. It is mandatory to fully complete the licence form before 12pm the next day.

Licence Actions: [Hide Stage Info.](#)

Submit

Delete Draft

If selecting a polyline, option available to cancel should you require it. Option to mark map and continue in new direction to draw curve. Double click on last point to complete polyline.

# Complete mandatory fields in Excavation Code pop up box.

The screenshot displays the 'Maproad Roadworks Licensing' web application interface. The browser address bar shows the URL: <https://uat.maproadroadworkslicensing.ie/MRL/ManageLicense-18198-1>. The application header includes 'No Code' and 'Cork County Council'. The main navigation menu contains 'Licence Form', 'History', and 'Fees'. Below this, there are tabs for 'Works Segments', 'Works Details', 'Traffic', 'Assets Affected', 'Attachments', and 'Standard Conditions'. The 'Works Segments' tab is active, showing a form with the following fields:

- Location Description:
- Road Segment Number:
- 

A map is displayed below the form, showing a road network with a red pin indicating the location. The map includes a scale bar and coordinates: **CPS | IING | ITM** Latitude: 51.811850 Longitude: -8.536229. The map is powered by Leaflet and Ordnance Survey Ireland.

An 'Excavation Code: No Code' pop-up box is overlaid on the map. It contains the following form:

- Add Surface Details**
- Specify the surface details and excavation dimensions.
- Part of Road:
- 

The right-hand side of the application shows a 'Stage Description' section with a 'Hide Stage Info' button. Below this, there are 'Licence Actions' including 'Submit' and 'Delete Draft'. The bottom of the screen shows the Windows taskbar with various application icons and the system tray displaying the time as 10:06 and the date as 22/03/2017.

Select "Add" to continue.

The screenshot shows a web browser window with the URL <https://uat.maproadroadworkslicensing.ie/MRL/ManageLicense-18198-1>. The page title is "No Code" and the user is logged in as "T4 Cork County Council". The navigation menu includes "Licence Form", "History", and "Fees". The "Licence Form" section has sub-tabs for "Works Segments", "Works Details", "Traffic", "Assets Affected", "Attachments", and "Standard Conditions".

The "Works Segments" section contains the following text: "Please identify exactly where each excavation or trench will take place. To do so, click the + icon on the top left of the map until fully zoomed in on the location. Then click on the excavation marker or polyline tools. Move the Marker / Drawing Tool across the map and click on the map to pin point as accurately as possible the location of the excavation or trench. It is possible to edit the details of existing excavations and trenches by clicking on the excavation marker or trench line once it has been positioned."

Form fields include:

- Location Description:
- Road Segment Number:
- 

The map shows a street layout with a red pin. A pop-up window titled "Excavation Code: No Code" is open, showing "Add Surface Details" with the following fields:

- Part of Road:
- Geometry:
- Existing Roadway Type:
- Length (m):
- Width (m):
- Depth (m):
- Kerb Affected (m):

Buttons for "Back" and "Add" are at the bottom of the pop-up. The bottom of the browser window shows the Windows taskbar with the time 10:07 and date 22/03/2017.

Excavation details may be reviewed or edited. Please select “Save”.
